“Do not be smart when writing code, write boring code creating exiting products.”

Summary

Educated as a Mathematical Physicist, started out with Embedded Systems, quickly ended up writing back-end code in Scala and Typescript. Currently creating scalable and resilient systems in the cloud using MongoDB, Redis, and Golang.

In my spare time, I mostly cook, walk, read, and tinker with computers. My natural habitat is in Emacs using Linux, but to bring home shiny rocks to pay for dog food I am very often seen on a mac.

If you think <https://grugbrain.dev> is hilarious and true, lets talk!

Experience

Software Engineer

Lund, Sweden

QLIK

Aug. 2021 - present

- Focused on making the biggest impact I can.
- In depth work on performance, scalability, and resiliency.
- Learned what a truly empowered team can do.

Software Engineer

Malmö, Sweden

UNDISCLOSED (AFRY)

Feb. 2018 - Aug 2021

- Working with Scala and TypeScript.
- Taking a technical leadership role in the team driving code quality and increased developer productivity and quality of deliverables.
- Learned a lot producing and releasing high quality software at fast pace in an environment with many stakeholders and unknowns.

Software Engineer

Malmö, Sweden

ADVENICA (AFRY)

Sep. 2018 - Dec. 2018

- Levering Linux and C/C++ knowledge, developing support for new network protocols in network segmentation products for critical infrastructure.
- Improved ability to write performant, safe, high quality C/C++ code under tight deadlines.

Education

Lund University

Lund, Sweden

M.SC IN PHYSICS

Sep. 2016 - Jun. 2018

Focus on theoretical and mathematical physics.

Lund University

Lund, Sweden

B.SC IN PHYSICS

Sep. 2013 - Jun. 2016

Focus on computational and mathematical physics.

Honors & Awards

2018

NanoLund Junior Scientist Ideas Award, For M.Sc project exploring novel applications of machine learning.

NanoLund

2013

Swedish Junior Water Price., Award for high school degree project.

Stockholm

International Water
Institute.

Teaching a Neural Network Quantum Mechanics. A Deep Learning Approach to the N-Representability Problem.

M.Sc thesis.

AUTHOR

2018

<https://lup.lub.lu.se/student-papers/search/publication/8951887>

Numerical simulations of contact geometry effects on transport properties of semiconductor nanowires

B.Sc thesis.

AUTHOR

2016
