“Do not be smart when writing code, write boring code creating exiting products.”

Summary

Educated as a Mathematical Physicist, started out with Embedded Systems, ended up writing back-end code in Python, Scala, and Typescript, finally fell in love with Golang working on creating scalable and resilient systems in the cloud.

In my spare time, I like to go hiking, read interesting articles and tutorials, work on private programming projects, and tinker with computers. Many of my skills originate from learning in my spare time. My natural habitat is in Emacs using Linux, but to bring home shiny rocks to pay for dog food I am very often seen on a mac.

If you think <https://grugbrain.dev> is hilarious and true, lets talk!

Experience

Golang Backend Software Engineer

Lund, Sweden

QLIK

Aug. 2022 - present

- Passionately using Golang and Confluence to make the biggest impact I can.
- Focus on performance, scalability, and resiliency.
- Gained new strategies into how I can grow my impact beyond “completing tasks”.

Backend Software Engineer

Malmö, Sweden

UNDISCLOSED (AFRY)

Feb. 2018 - Aug 2021

- Working with Python, Scala, and TypeScript.
- Taking a technical leadership role in the team driving code quality and increased developer productivity and quality of deliverables.
- Learned a lot producing and releasing high quality software at fast pace in an environment with many stakeholders and unknowns.

Embedded Systems Software Engineer

Malmö, Sweden

ADVENICA (AFRY)

Sep. 2018 - Dec. 2018

- Levering Linux and C/C++ knowledge, developing support for new network protocols in network segmentation products for critical infrastructure.
- Improved ability to write performant, safe, high quality C/C++ code under tight deadlines.

Education

Lund University

Lund, Sweden

M.SC IN PHYSICS

Sep. 2016 - Jun. 2018

Focus on theoretical and mathematical physics.

Lund University

Lund, Sweden

B.SC IN PHYSICS

Sep. 2013 - Jun. 2016

Focus on computational and mathematical physics.

Honors & Awards

2018 **NanoLund Junior Scientist Ideas Award**, For M.Sc project exploring novel applications of machine learning.

NanoLund

2013 **Swedish Junior Water Prize.**, Award for high school degree project.

*Stockholm
International Water
Institute.*

Writing

Teaching a Neural Network Quantum Mechanics. A Deep Learning Approach to the N-Representability Problem.

M.Sc thesis.

AUTHOR

2018

<https://lup.lub.lu.se/student-papers/search/publication/8951887>

Numerical simulations of contact geometry effects on transport properties of semiconductor nanowires

B.Sc thesis.

AUTHOR

2016
